

Bay Marshalling Kiosk

Model: CCORBMK

Tailor Made, World-class marshalling kiosks for electrical substations and many other outdoor applications. The marshalling kiosks are used to provide convenient connection points for the various control, protection and instrumentation cables which are used in substations. This includes power and instrument transformers and switchgear equipment.

Our marshalling kiosks are custom designed for each individual application, the design process ensures that the correct amount of equipment is included for both the current application and also for any future expansion that may be required. The marshalling kiosks can be provided with front and rear access or in some applications front only access where substation space may be limited.

Applications

- ✓ Substations
- ✓ Power Stations
- ✓ Utilities
- ✓ Control and Instrumentation
- ✓ Wind-farms and many more...

Technical Specification

Size	As per customer requirement
IP Class	IP 65
Make	SS316L
Thickness	2 mm
Lock	3 position Lock
Earth Bar	2 Nos.
Terminals for CT/VT connections	Phoenix Contact
Terminals for Switching connections	Phoenix Contact
AC/DC Field cabling	Phoenix Contact
Heater with Hygostat	Yes, with On/Off Switch
AC MCB	EU make
DC MCB	EU make
Plug Sockets	EU make
